

PLANNING SESSIONS EWCBR 2011

Monday March 14th, A.M.

- J. Nargeot : **New ion channels and their potential therapeutic interest.**

Monday March 14th, P.M.

- C. O'Brien : **Animal models of addictive disorders**
- K. Schmidt : **Concepts of cortical coding**

Tuesday March 15th, A.M.

- M. Pohl : **Nerve-glia crosstalk in the spinal cord : fundamental role in the development and persistence of pain**

Tuesday March 15th, P.M.

- G. Badaut & A. Obenaus : **Traumatic brain Injury : models, treatments and mechanisms**
- R. Ilmoniemi : **Characterizing the excitability and connectivity of the brain**

Wednesday March 16th, A.M.

- N. Haddjeri : **New approaches for the treatment of major depression**
- I. Nagy & J. Palecek : **Recent advances in understanding of peripheral and spinal nociceptive mechanisms of pathological pain**

Wednesday March 16th, P.M.

- R. Cunha : **Caffeine control of brain function – role of adenosine receptors**
- A. Irving & R. Mangieri : **G protein-coupled receptors : from endogenous ligands to behavior**

Thursday March 17th, A.M.

- M. Mc Innis : **The long run : Post-genomic longitudinal studies of bipolar disorder**
- J. Nargeot : **Ischemia and reperfusion injuries : protective strategies**

Thursday March 17th, P.M.

- R. Dantzer & J.M. Saavedra : **The many facets of neuroinflammation: new perspectives and therapeutic opportunities**

Friday March 18th, A.M.

- R. Pumain & C. Wasterlain : **Epilepsy & epileptogenesis : what's new? (PART 1)**

- W. Sommer : **Neuroimaging in Alcoholism**

Friday March 18th, P.M.

- R. Pumain & C. Wasterlain : **Epilepsy & epileptogenesis : what's new? (PART 2)**
